

**DAY TOUR PERU: 1-DAY PUCUSANA AND LIMA  
WETLANDS**

*Inca Tern must rank as one of the most spectacular terns worldwide.*

This is the perfect option for those who only have one day in Lima city and would prefer to head out birding and enjoy good views of several coastal birds such as **Inca Tern** and **Humboldt Penguin**, as well as a host of other exciting and charismatic Peruvian species including a few Peru bird endemics.

Our trip will begin with a 7 AM pick-up from your hotel after which we will drive south to the fishing village of Pucusana. Here we will enjoy views of **Belcher's**, **Kelp**, and **Grey Gull**. We will have close up views of the gorgeous **Inca Tern**, **Blackish Oystercatcher**, **Peruvian Pelican**, **Peruvian Booby**, **Red-legged** and **Neotropical Cormorant** and the endemic **Peruvian Seaside Cinclodes**. Depending on the time of the year, we can also expect to find **Ruddy Turnstone** and **Surfbird**. A short boat ride around the main Pucusana island will provide hundreds of **Peruvian Boobies** and **Peruvian Pelicans** as well as **Blue-footed Booby**, **Humboldt Penguin** and some **Guanay Cormorant**. During the boat ride we should see **South American Sealion** and if we are lucky the elusive **Marine Otter**.

*We should see **Peruvian Booby** on our Pucusana boat trip.*

We shall leave Pucusana and drive south to the freshwater wetlands of Pantanos de Puerto Viejo where we will focus on the endemic **Coastal Miner**, **Peruvian Meadowlark**, **Grassland Yellow-Finch**, **Many-colored Rush-Tyrant**, **Wren-like Rushbird**, **Chestnut-throated Seedeater** and **Great Grebe**. If we are very lucky we might see the rare **Peruvian Martin**.

Near to the Puerto Viejo beach we can enjoy views of **Grey** and **Grey-headed Gull**, **American Oystercatcher** and depending on time of year, a nice selection of waders such as **Whimbrel**, **Spotted Sandpiper**, **Sanderling**, **Greater** and **Lesser Yellowlegs**, **Semipalmated Plover** and **Killdeer**.

We shall head back to Lima with a short stop at the freshwater wetlands of Pantanos de Villa where we hope to add few more species such as **Common Gallinule, Andean Coot, Cinnamon Teal, White-cheeked Pintail, Andean Duck, Pied-billed Grebe** and with luck **White-tufted Grebe**. Depending on the time of the year, it is possible to find **Black Skimmers, Laughing Gull** and large numbers of **Franklin's Gull**. We will try for the secretive **Plumbeous Rail** and several garden birds such as **Long-tailed Mockingbird, Scrub Blackbird, Vermillion Flycatcher, Tropical Kingbird, House Wren**, and **Amazilia Hummingbird**. We will end the trip at your hotel at around 5 PM.

*The attractive **White-tufted Grebe** can be seen in wetlands around Lima.*
