

MADAGASCAR: 8-DAY NORTHWEST EXTENSION

October/November 2026/2027

By request – please e-mail info@birdingecotours.com

Madagascar Fish Eagle is one of the special birds we will be looking for on this tour.

This northwest Madagascar extension is designed around seeing several range-restricted Madagascar bird endemics that are not possible on the standard eastern and southern Madagascar birding itinerary. To find many of these northwestern specials we will be concentrating our time in Ankarafantsika National Park which has an impressive bird list of 129 species, more than half of them endemic to Madagascar. Some of the standout specials include **White-breasted Mesite**, **Van Dam's Vanga**, **Schlegel's Asity**, **Madagascar Ibis**, the elusive **Banded Kestrel**, and the more easily observed **Madagascar Fish Eagle**, which can often be seen at Ravelobe Lake, where the endangered **Humblot's Heron** can also be seen.

Humblot's Heron is regular at Lake Ravelobe.

Itinerary (8 days/7 nights)

Day 1. Arrival in Antananarivo

You can arrive in Madagascar's capital at any time today, after which you will be transferred to the hotel.

Overnight: Relais des Plateaux, Antananarivo

Day 2. Antananarivo - Mahajanga (Majunga) - Ampijoroa (Ankarafantsika National Park)

We will leave the hotel after breakfast, take our flight to Mahajanga, and eventually drive directly to Ankarafantsika (about four hours' drive), heading for the Ampijoroa dry deciduous forest. A three-night stay should allow us to spot most of the key birds of the area. En route to Ankarafantsika, we plan to stop at Lake Amboromalandy and at rice fields to try to find birds like **Madagascar Jacana**, **Malagasy Pond Heron**, **Humblot's Heron**, the strange **Black Heron**, and others.

Time-permitting, we can spend time at Lake Ravelobe, scanning for the Critically Endangered **Madagascar Fish Eagle**, the Endangered **Madagascar Jacana**, and many other birds. Beware of crocodiles, please, and don't walk too close to the lake! We then return to our accommodation, checking the trees around the "lodge" for spectacular birds, including **Sickle-billed Vanga**, **Crested Coua**, **Madagascar Green Pigeon**, **Grey-headed Lovebird**, and many others. If we're not too tired, we might do a night walk tonight (otherwise the next evening), and this might generate **Madagascar Nightjar**, owls, chameleons, and nocturnal lemurs.

Overnight: Asity Lodge, near Ankarafantsika National Park

*The unusual **Sickle-billed Vanga** should be seen on this tour.*

Days 3 – 5. Three more nights at Ampijoroa

We have another early start to visit the various sections of Ankarafantsika. Here we need to find mega-amazing birds such as **White-breasted Mesite**, **Van Dam's**, **Hook-billed** and **Rufous Vangas**, **Madagascar Ibis**, the incomparable and spectacular **Schlegel's Asity**, **Red-capped**, **Coquerel's** and **Crested Couas**, and lemurs like the spectacular **Coquerel's Sifaka**. One

afternoon we plan to do a boat trip on the lake for species mentioned previously that might have been missed.

Overnight: Asity Lodge, near Ankarafantsika National Park

Day 6. Ampijoroa to Mahajanga

After final “cleanup” birding in the dry forests of Ankarafantsika we will drive back to Mahajanga (Majunga) - a very lively town with plenty of rickshaws. Then we’ll take a boat trip into the Betsiboka Delta, where we’ll bird the mangroves for rare species such as **Malagasy Sacred Ibis** and **Bernier’s Teal**, along with a host of tropical shorebirds, terns, and more.

Overnight: Roche Rouge, Mahajanga

Day 7. Flight to Antananarivo, Tsarasoatra Lake

Today we will take a flight to Antananarivo. After arrival we will have a birding excursion to Tsarasoatra Lake and then transfer to our hotel.

Overnight: Relais des Plateaux, Antananarivo

*The shrike-like **Hook-billed Vanga** is one of the many vanga species we can see on this tour.*

Day 8. Flight home or beginning of the Masoala extension (following day)

Either your international flight will leave for home today or you will fly to Maroatsetra the following day for the start of the Masoala extension.

Please note that the accommodation on this extension is simple (24-hour electricity, but cold showers only), however, it is comfortable and tidy.

Please note that the itinerary cannot be guaranteed as it is only a rough guide and can be changed (usually slightly) due to factors such as availability of accommodation, updated information on the state of accommodation, roads, or birding sites, the discretion of the guides, and other factors. In addition, we sometimes have to use a different guide from the one advertised due to tour scheduling or other factors.

Duration: 8 days

Limit: 4 – 8

Dates: October/November 2026

October/November 2027

By request – please e-mail info@birdingecotours.com
